

PROFILE

Analytical, execution-focused product and program professional with a track record of delivering business-critical insights, marketing optimization, and data-driven solutions at Samsung R&D. Proficient in Python, Excel, SQL, and dashboard analytics, with practical experience managing Agile and Scrum projects. Adept at collaborating across product, operations, and analytics to turn data into decisions and drive impact in fast-paced settings.

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech.	SRM Institute of Science and Technology	9.26 (Current)	2022-Present
Higher Secondary	T.I School (State board)	90.7%	2020-2022
Secondary	T.I School (State board)	87.8%	2009-2019

EXPERIENCE

- Samsung R&D Institute

MAGPIE Intern

Jun 2025 - Jul 2025
Bangalore, India

– Developed automated browser-based data extraction tools using headless Chromium and Python for internal product analytics.

– Worked on scalable scraping systems to support real-time market insights within a confidential research team.
- Samsung R&D Institute

Samsung Prism R&D Intern

Feb 2024 - Aug 2024
Remote, India

– Developed prompt design strategies for LLaMA3 and Stable Diffusion XL, generating 10+ high-quality marketing visuals for Samsung mobile offers.

– Collaborated remotely with R&D team, delivering 5+ validated visual sets for Samsung campaigns within 6 months.

PROJECTS

- Watchly – Social Movie Companion Platform ☎

React.js, Node.js, MS Planner, Scrum, Agile

Feb 2025 – Apr 2025

• Built a social entertainment platform enabling users to watch, discuss, and review movies together, improving engagement and retention.

• Led the project using Agile Scrum methodology, managing feature backlogs, sprint planning, and delivery tracking through Microsoft Planner.

• Coordinated between frontend and backend development to translate business requirements into product features.
- Spotify User Analytics Dashboard ☎

Power BI, Excel, Power Query, DAX

Jul 2025 – Aug 2025

• Developed an interactive dashboard to analyze user behavior, music trends, and artist popularity.

• Performed data cleaning, transformation, and modeling using Power Query and DAX.

• Created KPI-driven visualizations to help stakeholders track engagement, growth trends, and content performance.

• Enabled data-driven decision making by converting raw streaming data into actionable insights.
- Multimodal Explainable AI for Diabetic Complication Prediction ☎

Deep Learning, ML, Medical Imaging

Dec 2025 — Current

• Multimodal Explainable AI system for predicting diabetic complications (eye, kidney, heart).

• CNN-based retinal analysis (EfficientNet) used as a systemic risk proxy.

• CT, ECG, and tabular ML models with cross-organ risk alignment and explainability.

SKILLS

Analytics & Product: Excel, SQL, Power BI, Power Query, DAX, MySQL, KPI Tracking, Backlog Prioritization, Agile, Scrum, MS Planner
Execution: Stakeholder Coordination, Sprint Planning, Timeline Ownership, Rapid Iteration, Communication
Technical: Python, Generative AI, React.js, SQL, APIs, VS Code, Jupyter, Power BI
